Abstract

The nomenclature of all 53 species-group taxa of Sarcophagidae proposed by Louis Pandellé, as well as six species-group taxa of this family proposed by other authors from specimens originating at least in part from the Pandellé collection, is revised with lectotype designations where necessary. A total of 35 lectotypes are designated for nominal species proposed by Pandellé, and a lectotype is designated for *Pierretia pandellei* Rohdendorf, 1937, which was proposed on specimens in Pandellé's collection. Five new synonyms are proposed and two nominal species are removed from synonymy. Reversed precedence is recommended for *Sarcophaga exuberans* Pandellé, 1896, **syn. n.** of *Sarcophaga jacobsoni* (Rohdendorf, 1937). Two sarcophagid genus-group taxa proposed by Pandellé and 11 sarcophagid genus-group taxa with Pandelléan nominal species as type species are reviewed.

Key words: Nomenclature, taxonomy, nominal species, Sarcophagidae, Pandellé, lectotype designation
