## Abstract

This paper is a review and revision of the tribe Sogdini (Coleoptera: Leiodidae: Leiodinae) of North and Central America. It covers the following genera: *Triarthron* Märkel, 1840, with one species; *Hydnobius* Schmidt, 1841, with seven species; *Stereus* Wollaston, 1857, new for North America, with one species; *Sogda* Lopatin, 1961, new for North America, with two species; *Kalohyd nobius* new genus, with three species; *Macrohyd nobius* new genus, with six species; and *Platyhyd nobius* new genus, with eight species. The species are inhabitants of northern and mountain forests or sandy habitats. Larvae and adults probably feed on subterranean fungi. The following new synonyms are recognized: *Triarthron pennsylvanicum* Horn, 1883 = *T. lecontei* Horn, 1868; *Hydnobius luggeri* Hatch, 1927 = *H. substriatus* LeConte, 1863; *Hydnobius lobatus* Hatch, 1936 = *H. longidens* LeConte, 1879; *Hydnobius longulus* LeConte, 1879 = *Sogda obtusa* (LeConte, 1879); *Hydnobius femoratus* Hatch, 1936 = *Kalohyd nobius strigilatus* (Horn, 1880); and *Hydnobius stacesmithi* Hatch, 1957 = *Macrohyd nobius matthewsii* (Crotch, 1874). *Hydnobius kiseri* Hatch, 1936 and *H. longidens* LeConte, 1879 are resurrected from synonymy to valid species status. The following new combinations are established: *Sogda obtusa* (LeConte, 1879), ex *Hydnobius*; *Kalohyd nobius strigilatus* (Horn, 1880), ex *Hydnobius*; *Macrohyd nobius contortus* (Hatch, 1957), ex *Hydnobius*; *M. crestonensis* (Hatch, 1957), ex *Hydnobius*; *M. matthewsii* (Crotch, 1874), ex *Hydnobius*; *M. simulator* (Brown, 1932), ex *Hydnobius*; *Platyhyd nobius arizonensis* (Horn, 1885), ex *Hydnobius*; and *P. validus* (Brown, 1932), ex *Hydnobius*. Lectotypes are designated for *Hydnobius substriatus* LeConte, 1863; *H. pumilus* LeConte, 1879; *H. obtusus* LeConte, 1879; *H. longulus* LeConte, 1879; *H. strigilatus* Horn, 1880 and *H. matthewsii* Crotch, 1874. New species are *Hydnobius acarinus*, *H. autumnalis*, *Stereus arenarius*, *Sogda enigma*, *Kalohyd nobius californicus*, *K. dentatus*, *Macrohyd nobius montanus*, *M. tibiocalcaris*, *Platyhyd nobius andersoni*, *P. bicolor*, *P. calvario*, *P. howdenorum*, *P. latigra*, and *P. newtonorum*.

**Key words:** *Triarthron*, *Hydnobius*, *Stereus*, *Sogda*, *Kalohyd nobius*, *Macrohyd nobius*, *Platyhyd nobius*, taxonomy, new genus, new species
