### Abstract

This catalogue of cancellarioidean taxa is composed of three sections. The first lists alphabetically 124 genus-group taxa originally proposed or later included within the superfamily as well as 24 misspelled or nude names. The second section lists alphabetically 1,864 species-group names proposed in or subsequently referred to genera now considered to belong in Cancellarioidea. Also listed are 392 nude names, misspellings and incorrect attributions. The third section consists of a bibliography of works referred to in this paper.

**Key words:** Cancellarioidea, genus-list, species-list, bibliography
