### Abstract

The genus *Scirtothrips* and related genera in Japan were studied, and the following four genera and eight species recorded: *Anascirtothrips okinawanus* n. sp., *Drepanothrips reuteri* Uzel, *Scirtothrips albidus* n. sp., *S. dorsalis* Hood, *S. flavus* n. sp., *S. katsura* n. sp. and *S. machili* n. sp., *Parascirtothrips fagaceae* n. gen. et sp. The male of *D. reuteri* is recorded from Japan for the first time. Ten genera are recognized in the *Scirtothrips* genus group, and relationships between these are discussed.

**Key words:** Thysanoptera, Thripidae, *Anascirtothrips*, *Drepanothrips*, *Parascirtothrips*, *Scirtothrips*, *Scirtothrips* genus group, Japan
