Abstract

Fourteen new species of the East Asian genus *Stenoloba* Staudinger, 1892 (Noctuidae, Bryophilinae) (*S. ansari* sp. n.; *S. wolfgangi* sp. n.; *S. albibasis* sp. n.; *S. futioides* sp. n.; *S. javensis* sp. n.; *S. viridibrunnea* sp. n.; *S. benjamini* sp. n.; *S. dentilinea* sp. n.; *S. siamensis* sp. n.; *S. mossy* sp. n.; *S. ronkayi* sp. n.; *S. sacculata* sp. n.; *S. pinratanai* sp. n. and *S. matovi* sp. n.) are described from Indonesia, Thailand and Vietnam. Nine species of *Stenoloba* are recorded from Indonesia and Malaysia, and the total number of species in the genus increases from 61 to 75. Adults and male and female genitalia are illustrated for the new species, and an updated checklist of the genus presented.

Key words: Lepidoptera, Noctuidae, Bryophilinae, *Stenoloba*, new species, South East Asia, Indonesia, Vietnam, Thailand
