

### **Nomenclatural note: *Heteropathes* (Cnidaria: Anthozoa: Antipatharia: Cladopathidae): A new name for *Heliopathes* Opresko, 2003**

D. M. OPRESKO

*U.S. National Museum of Natural History, Smithsonian Institution, Washington, DC, USA. E-mail: dmopresko@hotmail.com*

The generic name *Heliopathes* Opresko, 2003 (see also Opresko 2005) proposed for an antipatharian coral (Cnidaria: Anthozoa: Antipatharia) of the family Cladopathidae, subfamily Hexapathinae (Opresko, 2003), is preoccupied by the darkling beetle genus *Heliopathes* (Coleoptera, Tenebrionidae), proposed by Mulsant (1854). Therefore the substitute name *Heteropathes* is proposed for the antipatharian.
