**WONG, K.J.H., SHIH, H.-T. & CHAN, B.K.K. (2012) The ghost crab *Ocypode mortoni* George, 1982 (Crustacea: Decapoda: Ocypodidae): redescription, distribution at its type locality, and the phylogeny of East Asian *Ocypode* species. *Zootaxa*, 3550, 71–87.**

1) Page. 82, figure 9, within the clade containing the "ridge-less" *Ocypode* species, marked in gray bars, labels of "*O. cordimanus* (Taiwan)" and "*O. sinensis* (Hong Kong; Taiwan)" should be reversed with each other.

2) Page 82, figure 9, the three haplotypes, "Osi1", "Osi2" and "Osi3" belong to the species *O. sinensis* from material collected from Hong Kong and Taiwan, and "Oco" was extracted from *O. cordimanus* material from Taiwan. See table 1 in the original paper for details of the sequences/haplotypes.
