JESSE EASTER (2013) A new name for the oviraptorid dinosaur “Ingenia” yanshini (Barsbold, 1981; preoccupied by Gerlach, 1957). *Zootaxa*, 3737(2): 184–190.

The following corrections and acknowledgements should be added to the paper. Holotype and paratype composition, paratype variation, and data on specimens improperly referred to *Ingenia yanshini* were compiled by Mickey Mortimer and should be credited to his website: <http://archosaur.us/theropoddatabase/Oviraptorosauria.htm#Ingeniayanshini>. Mortimer was cited in an early version of the manuscript but this was removed during review. Mortimer should have been consulted prior to using his data, and this is an error on my part.

Figure 1 was redrawn by Jennifer Haruta from Barsbold *et al.* (1990) and reversed; the elements figured are from the left side of the body.
