Latin abbreviations and words used in scale insect literature (Hemiptera: Sternorrhyncha: Coccoidea)

DOUGLAS J. WILLIAMS¹ & GIUSEPPINA PELLIZZARI²

¹The Natural History Museum, Department of Life Sciences (Entomology), London SW7 5BD, UK

²University of Padova, Dipartimento di Agronomia, Animali, Alimenti, Risorse Naturali e Ambiente DAFNAE, viale dell'Università 16, 35020 Legnaro, Italy. E-mail: giuseppina.pellizzari@unipd.it

Latin abbreviations and words have been used in the zoological literature since Linnaeus (1758), although some are now rare but were in common usage in the 18th and 19th centuries. The following list of Latin abbreviations and words is prepared to help students of scale insects who are not acquainted with Latin and those who may be just beginning to learn about the study of scale insects with its vast literature. There are many more abbreviations in zoological literature but the list concentrates on those used in scale insect literature.

Latin abbreviations and words are reported in table 1. This gives the abbreviation or word first, followed by the Latin meaning in full, then the English meaning and an example taken from scale insect literature. The full reference of the authors cited in the “example” can be easily found in Ben-Dov *et al.* (2013). When there are two letters or two words, some authors prefer to reverse them. Referring to the section “Glossary” of the International Code of Zoological Nomenclature (International Commission on Zoological Nomenclature, 1999) can also help with the meaning of some other Latin words used in systematics.

This list is the third and last of a series of papers on Latin or Greek used in scale insect literature. For some Latin and Greek names see Williams (2011), and for simple rules on Latin grammar see Pellizzari & Williams (2013).

Acknowledgements

We are most grateful to Alessandro Minelli, Full Professor of Zoology, Department of Biology, University of Padova, Italy, for kindly reading the manuscript and for his suggestions that have improved the text. Professor Minelli was President (1995–2001) of the International Commission on Zoological Nomenclature; he is also Editor of Nomenclature for the journal Zootaxa.

TABLE 1. Latin abbreviations and words

Abbreviation	Full Latin word	Meaning	Example
auct.	<i>auctorum</i>	of authors; it means that the species name is used in the sense of a number of subsequent authors in a way that differs from the original or established definition about	“ <i>Diaspis betulae</i> Baerensprung (auct.)” : name used by several authors, but a synonym of <i>Epidiaspis leperi</i> Signoret.
ca.	<i>circa</i>	compare	(cf. p.229) = compare at page 229; (cf. Bachman, 1952 = compare in the paper by Bachman, 1952
cf.	<i>confer</i>	compare below: compare with something stated some lines below	Balachowsky 1954, 278: “Puparium inconnu, species... parthéno-génétique (Ferris) (cf. <i>infra</i>)”
<i>cf. infra</i>	<i>confer infra</i>	compare above: compare with something stated some lines before	Balachowsky 1954, 214: “Caractères généraux identiques... pour le genre (cf. <i>supra</i>)”
<i>cf. supra</i>	<i>confer supra</i>	cited	Pellizzari & Hodgson 2007, 3: “Holotype... ex leaves of <i>Agave americana</i> , P. Fontana coll.” = specimen collected by P. Fontana De Lotto 1977, 19: “ <i>Allococcus elisabethae</i> (Brain) comb. nov. ” = the species was first described by Brain as <i>Pseudococcus elisabethae</i>
cit.	<i>citatus</i>	he or she collected	Balachowsky 1935, 123: Balachowsky del. = drawn by Balachowsky
coll.	<i>collegit</i>	new combination: used when a species is transferred from one genus to another	Pellizzari & Fontana 2002, 203: “ <i>Lecanopsis marottai</i> sp.n. <i>Derivatio nominis</i> : the species is dedicated....to S. Marotta.”
comb. n. or comb. nov. (usually in bold)	<i>combinatio nova</i>	compare	Balachowsky 1935, 123: Balachowsky del. = drawn by Balachowsky
<i>conf.</i>	<i>confer</i>	he or she drew or illustrated	Pellizzari & Fontana 2002, 203: “ <i>Lecanopsis marottai</i> sp.n. <i>Derivatio nominis</i> : the species is dedicated....to S. Marotta.”
<i>delineavit</i>		origin of the name, etymology	
<i>derivatio nominis</i>		he or she identified	
det.	<i>determinavit</i>	for example	
e.g.	<i>exempli gratia</i>	and others: used for more than two authors when quoting a reference in the text.	(Takagi <i>et al.</i> , 1988) or Takagi <i>et al.</i> (1988), instead of Takagi, Pong & Ghee (1988)
<i>et al.</i>	<i>et alii</i>	<i>et aliae</i> = and others (gender masculine), <i>et aliae</i> = and others (gender feminine), <i>et alia</i> = and other things, (gender neuter). Mixed-gender groups would use <i>et alii</i> .	
<i>et aliae</i>		figure	
<i>et alia</i>		new genus	
f. or fig.	<i>figura</i>	that is	Balachowsky 1953, 19: <i>Benaparlatoria</i> Gen. Nov.
gen. n. or gen. nov. (in bold)	<i>genus novus</i>	the same: in references when referring to the same author or in captions when referring to the same species in correspondence: when citing unpublished information, given to the author by letter or message	Balachowsky 1954, 39: “Planche 2 <i>Lepidosaphes ulmi</i> L. 2. <i>Id.</i> , 3. <i>Id.</i> , marge pygidiale...”
i.e.	<i>id est</i>		Pellizzari & Porelli 2013, 209: “(Germanin, 2005, <i>in littoris</i>).”
<i>Id.</i>	<i>idem</i>		
in. litt.	<i>in littoris</i>	continued on the next page

TABLE 1. (Continued)

Abbreviation	Full Latin word	Meaning	Example
<i>incertae sedis</i> (genus or species <i>incertae sedis</i>): <i>lapsus</i> or more correctly <i>lapsus calami</i>		of uncertain position: usually when neither can be placed correctly in a tribe or subfamily. literally “slip of the pen”, error, usually a misspelling of a name	Zhang, Wang & Chen 1993, 173: “ <i>Pseudaulacaspis pentagona</i> ” = <i>lapsus calami</i> , as the correct species name is <i>pentagona</i>
I.c. or loc.cit.	<i>loco citato</i>	at the place cited: it is used when the reference is not only to the work immediately preceding, but also refers to the same page. he or she collected	Targioni Tozzetti 1868, 722: “Sp.1. <i>Orthaea Characias</i> Bosc., loc. cit.” De Lotto, 1958, 105: “(Brain, l.c.) Balachowsky, 1954, 80: “(Koroneos leg.)” = Koroneos collected the specimen
leg.	<i>legit</i>		
mihi	<i>mihi</i>	of me or to me: usually referring to a taxon described in a previous work by the same author of the work where <i>mihi</i> is used. Often used in articles published in the 18th and 19th centuries	Boratynsky & Williams, 1964, 107: “ <i>Lecanium corni-crudum</i> Green, 1930, nec Green, 1917”
nec	<i>nec</i>	Not: used to indicate a misspelled name.	Tanaka, 2012: “ <i>Pulvinaria citricola</i> Kuwana, 1914 (nec Kuwana, 1909).”
N.B.	<i>nota bene</i>	note well: often used at the beginning of a remark	
Nob.	<i>nobilis</i>	of us or to us: usually with the same value as <i>mihi</i>	Targioni Tozzetti, 1868, 725: “ <i>Dactylopius longispinus</i> nob.” = Targioni Tozzetti attributes to himself the description of the species <i>D. longispinus</i> , described in 1867.
<i>nomen dubium</i> (plural <i>nominia dubia</i>)		a doubtful name: a name of unknown or doubtful application	De Lotto, 1978, 138: “ <i>Ceroplastes fumidus</i> – <i>nomen novum</i> ” = A replacement name for <i>Ceroplastes simplex</i> De Lotto, homonym of <i>Ceroplastes simplex</i> Hempel.
n. n. or nom. nov. (usually written in bold)	<i>nomen novum</i>	new name: a name that replaces a name already established	Williams & Ben-Dov 2009, 16: “ <i>Coccus cinni</i> Gmelin, P.F., 1766: 41. <i>Nomen nudum</i> ;”
<i>nomen nud.</i> (plural <i>nominia nuda</i>)	<i>nomen nudum</i>	literally “naked name”: name without a description, an invalid name	Pellizzari & Fontana 2002, 136: “ <i>Rhizobium</i> Targioni Tozzetti, 1867: <i>nomen oblitum</i> ,”
<i>nom. cons.</i>	<i>nomen conservandum</i>	literally “a name to be conserved”; in zoology ‘conserved name’ is a name to conserve.	
<i>nomen oblitum</i> (plural <i>nominia obliterata</i>)		forgotten name: a name unused since 1899	
<i>nomen protectum</i>		protected name: a name which has precedence over its unused senior synonym relegated to the status of <i>nomen oblitum</i>	

.....continued on the next page

TABLE 1. (Continued)

Abbreviation	Full Latin word	Meaning	Example
op. cit.	<i>opere citato</i>	"in the work cited": it is used to refer the reader to a previously cited work, standing in for repetition of the full title of the work.	Targioni Tozzetti 1879, 396: " <i>Chionaspis evonymi</i> Comst. op. cit."
<i>partim</i>		Kawecki, 1971, 255: " <i>Lecanium franconicum</i> "; Sulc, 1932 (partim)" = only a part of the specimens tributary by Sulc, 1932 to <i>L. franconicum</i> Lindinger belong to this species.	
q.v.	<i>quod vide</i>	which see: when referring to something in the same text according to, in the sense of; it refers to the use of a name by an author in a sense different from that of other authors	Hodgson & Foldi 2006: A review of the Margarodidae <i>sensu</i> Morrison 1928
<i>sensu</i>		in a broad sense	Hodgson & Foldi 2006, 9: "The Margarodidae <i>s.l.</i> currently includes about 450 species"
s.l.	<i>sensu lato</i>		Giliomee 2001, 86: " <i>Asterolecanium machili</i> ...in the sense of Borchsenius... belongs to <i>Asterolecanium sensu stricto</i> "
s. str. or s. s.	<i>sensu stricto</i>	in a strict sense; generally referring to the nominal taxon in the narrow sense of its subordinate nominotypical taxon	De Lotto, 1977, 16: " <i>Allococcus confusus</i> spec. nov."
spec. nov. or sp. n. (usually in bold)	<i>species nova</i>	new species	Pellizzari & Fontana 2002, 135: " <i>L. rhizophila</i>remains the type species of the genus even if its identity...is unclear (<i>species inquirenda</i>)."
<i>species inquirenda</i>		Literally "a species to be looked into", a species incompletely defined that requires further clarification	
<i>stat. nov.</i>	<i>status novus</i>	new status	Tanaka, 2012, 7 : " <i>Pulvinaria nipponica</i> Lindinger, 1933, stat. res."
<i>stat. res.</i>	<i>status resurrectus</i>	resurrected status: used when a taxon, previously considered as a junior synonym, is newly considered a valid taxon.	
<i>stat. rev.</i>	<i>status revisus</i>	revised status: is used with the same meaning of stat. res.	Hodgson 2012, 58 : <i>Ceroplastes luteolus</i> De Lotto stat. rev. = the species <i>C. luteolus</i> was synonymised with <i>C. brevicincta</i> Hodgson 2012, 81: " <i>Ceroplastes vinsonioides</i> Newstead, 1911: 96. Syn. nov " = the species <i>C. vinsonioides</i> is synonymised with <i>C. personatus</i> Newstead, 1898.
	<i>synonymum novum</i>	new synonym	Maskell 1898, 224: " <i>Aspidiotus secretus</i> Cockerell, var. <i>lobulatus</i> "
var.	<i>varietas</i>	variety	Maskell 1898, 224: " <i>Aspidiotus secretus</i> Cockerell, var. <i>lobulatus</i> ", var. nov."
var. nov.	<i>varietas nova</i>	new variety	Balachowsky 1954: 65: " <i>Lepidosaphes conchiformis</i> Gmelin (v. <i>forma minima</i> Newst.)" = see the forma <i>minima</i>
v.	<i>vide</i>	see	
viz.	" <i>videre licet</i> " or <i>videlicet</i>	literally "it is permitted to see": that is, namely, it may be seen; evidently
