RAFAL BERNARD & BOGUSŁAW DARAŻ (2026) *Paragomphus sofiae* sp. nov.—a new spotted species of Hooktail from Madagascar (Odonata: Anisoptera: Gomphidae). *Zootaxa*, 5757 (4): 357–368.

The name of the new taxon, *Paragomphus sofiae*, is a noun in the genitive case, not a noun in apposition as stated in the Etymology on page 358. We thank Jean-Pierre Boudot and Heinrich Fliedner for pointing this out.
